

PLANNING AND ZONING COMMISSION COMMUNICATION

May 6, 2014

SUBJECT: Consider a Request for a Site Plan
SUBMITTED BY: Stephen Cook, AICP – Senior Planner
REFERENCE NO: 14-03-SP

ACTION REQUESTED:

Approve a request for a Site Plan for Residential Development proposed to be located on 12.897 acres of the Bradford Adam Survey, Abstract No. 152 to Lots 1-37, A, Block J, Lots 1-23, A, Block K, and Lot A, Block L.

ALTERNATIVES:

1. Recommend approval of the request – *simple majority*
2. Recommend approval of the request with modifications – *simple majority*
3. Recommend denial of the request – *simple majority*

SUMMARY OF SUBJECT:

Applicant: Lennar Homes

Location/Zoning: 12.897 acres of the Bradford Adam Survey, Abstract No. 152 to Lots 1-37, A, Block J, Lots 1-23, A, Block K, and Lot A, Block L. Located on the southeast corner of Bear Creek Parkway and Midway Drive.

Project Description: The Riverwalk Planned Development ordinance specifically requires the approval of a site plan for the development of single family residential uses. Normally applied to multi-family and non-residential development, the site plan process allows city staff, the Planning and Zoning Commission, and the City Council to examine the proposed aesthetic nature and quality of construction details which are usually outside of the typical technical subdivision requirements as exhibited within a preliminary plat document.

Site Layout: This property is located within the T4b transect sub-zone, which permits both

single-family detached and single-family attached (townhomes). Called the Villas at Bear Creek, the builder is proposing to develop R3 type lots with a single-family detached product. The subdivision will contain 60 residential lots with rear entry garages and three (3) open space lots. The R3 lot is 40' x 100' with 5' side yard setbacks, 15' front setback, and 20' rear setback. The homes built on the 4,000 s.f. lots must be a minimum of 1,700 s.f., with the minimum average size of 2,000 s.f. The alleys will be private, and along with the masonry screening walls, entryway features, and common areas, will be maintained by the Homeowners Association. The horse shoe shaped subdivision will have two (2) entrances off of a new street called Tuscany Trail that will be built on the south side of the subdivision between Minter's Chapel Road and Bear Creek Pkwy. Minter's Chapel Road will be built to connect to Midway Drive. Located on the east and south sides of the middle area of the subdivision are open spaces with 8' sidewalk trails that will serve as a pocket park for the residents and will give the appearance that the adjacent homes have large front yards. All of the lots will have a minimum six foot (6') sidewalk and nine foot (9') parkway in front of the homes which will provide a wide pedestrian connection to other elements of the Riverwalk Development.

Pedestrian Connectivity: Inherent to the site layout and the lot-level sidewalks are the internal trail system within the Villas subdivision. A sidewalk will extend south from Tuscany Trail on the east side of Bear Creek Parkway that will connect into the trail within NRP's Preserve at Bear Creek Urban Loft development that is under construction south of Tuscany Trail. A pedestrian crossing is being developed to connect The Preserve trail to the west side of Bear Creek Parkway, where a trail is being developed as part of Lennar's Dominion single-family detached subdivision, on the south and north of Midway Drive. Additionally, the City of Euless intends to make a new trail connection along the creek between the Riverwalk development and the Euless Family Life Center. The open spaces internal to the subdivision and along the greenway will be irrigated through the City of Euless reclaimed water system and be maintained by the subdivision's home owner's association.

Fencing, Screening and Landscaping: The proposed project has multiple areas of different landscape elements and screening. Masonry screening walls will be constructed adjacent to Midway Drive, Bear Creek Parkway, and Minter's Chapel Road. No screening wall will be constructed on the south side of Tuscany Trail at this time. NRP has the option to purchase the remaining undeveloped land to the south in order to develop Phase Two (2) of the Preserve at Bear Creek.

Signage: Primary monument signage with enhanced landscaping will be installed at Bear Creek Parkway and Midway Drive. Additional minor monument signage will be located at Minter's Chapel Road and Midway Drive, as well as Bear Creek Parkway and Tuscany Trail.

Street Trees: One of the unique opportunities within the Riverwalk single-family development, is the inclusion of street trees throughout the subdivision. The developer will install a variety of species types along the block lengths which are in front of the single family homes. The trees will be placed within the nine foot (9') wide parkway which is part of the required street frontage for these lot types. The street trees will account for the required two trees per lot. Individual homeowners will be required to maintain the trees in their yards

as well as the parkway. The street tree species have been selected to grow in a vertical – single trunk and will be able to be pruned in such a way as to not interfere with the passage of emergency vehicles down the streets. Placement of the trees is slightly staggered to accommodate for driveways and street lighting instruments.

Housing Quality: The Riverwalk PD establishes high quality architectural and design standards for all buildings types throughout the development. In addition to Euless' standard masonry percentage and type requirements, the residential builder is required to provide architectural details for each individual house construction plan. These plans include the front façade, as well as the sides. An example of the quality of the standards is a requirement that there is continuation of the secondary masonry materials, such as stonework, along the first several feet of the side walls of the homes. Additionally, architectural elements such as proportional windows that are taller rather than wide, and roof treatments such as gabling, are required to be continued onto the sides of the homes. The applicant has provided examples of typical home type elevations. To ensure compliance with the ordinance, staff will require that a checklist of compliant design elements be submitted with each building plan for building permit review. Prior to the submittal of any plans to the city, the Bear Creek Property Owner's Association will review plans to ensure compliance with the PD.

The applicant has worked extensively with the city to ensure that the various design goals for the Riverwalk as a master planned community are reflected in the application as presented. The Development Services Group has certified that the project is compliant with these standards. Staff recommends approval of the site plan.
